It is interesting to note that this disorder has been shown to be one of the commonest disorders but has only recently been given its own classification, having previously been confused with many other disorders. Prevalence In the 1998 American census it was discovered that 20% of the adult population, some 44.3 million, had a mental-health issue. In addition to this, 20% of the children had also been diagnosed with a behavioural or emotional issue; this equates to between 7.7 and 12.8 million children (Stillman, 2005). Bipolar Disorder is believed to affect around 2.3 million adults in America and a conservative estimate of a million children. In Sue, Sue & Sue (1997) the prevalence of bipolar disorder is placed...
