Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

A preliminary word of explanation regarding the mind world as a whole is necessary in order to avoid confusion. While, like the other regions, it is subdivided into seven sub-planes, it has the peculiarity that these seven are grouped into two sets--a three and a four. The three upper sub-planes are technically called arupa, or without body, owing to their extreme subtlety, while the four lower are called rupa, or with body. Man has two vehicles of consciousness, consequently, in which he functions on this plane, to both of which the term mind body is applicable. The lower...
