With its wings in that ridiculous forward position, the plane seemed to turn on one wing. It was almost as though the aircraft were able to push down against the direction it wanted to go, and it turned in an instant, right into the threat the MIG offered. Even as it turned it flipped over onto its side, performed one of the most amazing Immelman maneuvers Chang had ever seen, and suddenly had the brand new MIG in a precarious position. The hunter was now the hunted, and the leader watching on the ground realized that there was a brand-new killer in the air over Korea. The black phantom turned on the MIG before it could react, and, in what seemed like slow motion, a missile appeared underneath the plane, seemed to linger for just a moment, and then sped away at a dizzying speed. The year is 2025, and North Korea has discovered a way to fuel their growing missile inventory with oil discovered at the South Pole. They re invading Palmer Station, Antarctica.
