

## The Alpha Torque

By Zhiliang Cao, Henry Cao

Createspace, United States, 2010. Paperback. Book Condition: New. 198 x 124 mm. Language: English . Brand New Book. Which theory provides the foundation of physics, the Theory of Relativity, the Big-Bang, or the Standard Model? None of these existing theories can truly serve as the foundation of physics. There are countless physics papers and books, but none of them can answer the fundamental questions, such as why positive and negative charges exist, why quantum numbers exist, and why electron has mass and never decays. These theories can answer the complex issues, but cannot answer the fundamental issues. In fact, the fundamental questions are not purposely ignored; they are simply too hard to answer. As the result, questionable theories are accepted as laws of physics. In order to correct the faulty theories and provide a real foundation, my theory answers the fundamental questions. It starts from the common root for everything, conceptual or physical. The Torque theory unifies all physics theories. It is about space, time, and energy. Energy is about movements of space and cannot be separated from time, since movements are in time. Without energy, there will be no movements. Space-time will have nothing to measure. Therefore, space, time...
